"JINDAI" will become a master plan for Ena City's future lifestyle. The environment evokes Japanese nostalgia. To strike a balance between artificial intelligence technology and historical natural features. We got inspiration from the topography of Ena City, where the waves of the original landscape connect innovative conceptual systems that reverse the fluidity of Ena City. Taking JINDAI's "text visualization" as the central concept and referencing Japan's ancient culture, the city will develop and expand vertically in a better-diversified way.
